

Why should you consider an **organized** maintenance program for your vehicle?

You depend on your vehicle for work, family, and fun. When it's in the shop, your whole life is put on hold until you get it back.

You don't have to settle for unplanned breakdowns or fix-on-fail repairs. An organized maintenance program...

- Ensures that your vehicles get the attention they need, when they need it
- Helps you to plan necessary maintenance time around your schedule rather than planning your schedule around unplanned breakdowns
- Keeps your vehicles on the road more and in the shop less
- Keeps minor problems from becoming major ones, reducing the overall cost of repairs
- Reduces the number of unexpected breakdowns
- Lets you budget in advance when big-ticket repairs are necessary
- Makes sure that you squeeze every mile out of your major equipment investment
- Facilitates communication, repair, and planning of your vehicle maintenance

Coherent, planned maintenance helps keep your vehicles safe, breakdown-free, and operating at their best... so you can concentrate on keeping your life running at its best.

Service. Trust. Commitment.

When I opened my own shop in 1981, I set out to be a mechanic people would trust to keep their complex and expensive vehicles operating at their best for the long term. We've come a long way since those early days, but by providing expert repairs, impeccable service, and most importantly by respecting our clients, we've built a company that is unique in the automotive repair business.

It's a simple philosophy... care for our client's vehicles like we would care for our own. It may be simple, but it's the foundation of a company that's kept our loyal clients coming back to us year after year. When you try our service, we think you'll agree that this is exactly the philosophy you've been looking for in automotive care.
